Termite and Pest Experts

### Business overview.

Pink Termite and Pest Experts are a family run business that have been protecting NSW, ACT & South Pacific residents for over 36 years. We combine our industry leading experience with local knowledge to deliver the best quality termite & pest management for our clients.

Pink provides a combination of experience, expertise & technology that means we provide you with the very best defense you can find against termites & pests. We only use high quality products for each individual situation, assessing the type of problem, the construction & the materials of the building as well as local soil conditions & any specific environmental considerations.

Ultimately, Pink provides you with the very best in termite and pest management, from residential to commercial to corporate, Pink is your partner of choice. Our highly trained technicians are licensed and insured and comply with all relevant standards and WHS requirements. We specialise in the construction and delivery of HACCP compliant programs, including AEPMA certified field biologists as part of our Specialist Team.

We are an accredited Secure Local Jobs supplier with the ACT Government.

### With Pink, it's Personal.

Pink was founded as a family business in 1985. Our organisation is agile and robust, offering personalised bespoke pest management services for individuals, whilst at the same time catering to the varying needs of large corporate and commercial entities. We service NSW, ACT and the South Pacific with industry leading termite & pest management solutions. We don't adopt the one size fits all approach. We design & implement treatments that are tailored to our customers at no extra cost no matter how large or small.

### The Pink Difference.

We believe great service makes all the difference. It's something you'll notice from the moment you call one of our friendly staff. Everything we do is focused on delivering the best experience to our customers, whether they are a single home, a corporate office block or a livestock entity. From providing a fixed price obligation free quote, to only using the safest & most up to date treatment solutions, through to our highly skilled technicians, we are proud to deliver the highest level of quality service. Our technician team including our Directors are all technically qualified. Our administration team is advised & trained by our technical staff to be knowledgeable on all aspects of pest control. And all of our programs are designed by technically qualified staff. Our reputation and knowledge sell themselves. When you choose to use our services, you'll find our customer service staff and technicians are only too happy to discuss any questions or concerns you may have.

Flir T540 Thermal Imaging Camera

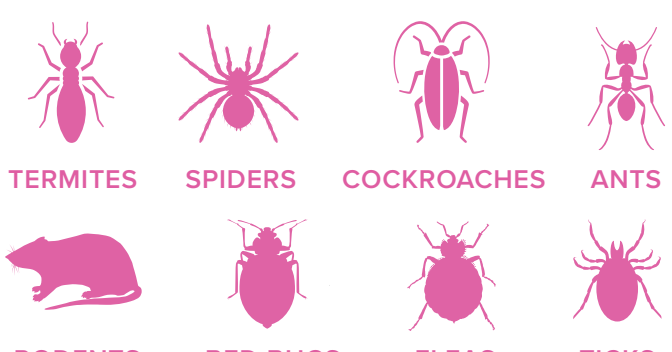

### Specialist Equipment.

Thermal imaging devices are non invasive and can detect extremely small variations in the surface temperature of different parts of a building. These differences are then graphically displayed as an image which can be interpreted by one of our trained thermographers.

The use of a thermal camera for a termite inspection can reveal termite infestations that are not detectable when carrying out a visual only inspection. A visual inspection can miss 80% of what's going on behind walls and in difficult to reach areas such as roofs.
